

ECOFIBER FABRIC

CLEANING & CARE INSTRUCTIONS

Ecofiber Performance Fabrics offer naturally inherent soil & stain resistance, with no added treatment. Due to its solution dyed yarn technology, Ecofiber fabrics are bleach cleanable and color fast. Though not liquid repellent, spills and stains release easily with mild soap & water for easy cleaning. All Ecofiber fabrics are proudly free of PFC chemicals and made in the USA.

CLEANING INSTRUCTIONS

The spot cleaning method of stain removal can be used for most light to medium stains. For stubborn or excessive stains, we recommend spot cleaning with bleach.

1. Before spot cleaning, blot up liquids with a clean, soft towel and brush off any loose dirt
2. Prepare a cleaning solution of 1/4 tsp mild, enzyme detergent (such as Tide®, Woolite® or Dawn® dishwashing liquid) per 1 cup of lukewarm water

OR

Prepare a bleach based cleaning solution: one ounce of bleach to 30 ounces of water in a clean spray bottle

3. Work the solution into the fabric using a sponge or soft bristle brush
4. Rinse the cleaner from the surface with a clean cloth and water (removing cleaner residue prevents future soil buildup)
5. Repeat the process if needed and then let the fabric air dry

CARE INSTRUCTIONS

Regular and proper maintenance of your upholstery fabric will reduce soil build-up and help the fabric last for generations.

- Vacuum regularly with an upholstery attachment to thoroughly dust and remove lint.
- Promptly treat spots and stains. See cleaning instructions.
- An annual professional cleaning will keep your upholstered furniture looking its best.
- Do not rub or brush excessively or you may potentially break down the yarns.

We are proud to offer an ever-growing selection of Ecofiber performance fabrics. Visit our website, CharlotteFabrics.com to see them all!!
