

LIFEGUARD FABRIC

CLEANING & CARE INSTRUCTIONS

Turn standard fabric into performance fabric with our Lifeguard Finish. Featuring permanent liquid, stain, soil & odor repellency, our Lifeguard finish makes it easier to keep your fabrics looking fresh and clean. This ECO-friendly finish is free from harsh chemicals and penetrates the fabric, bonding to fibers for protection that lasts for the life of the fabric.

CLEANING INSTRUCTIONS

Most liquids simply roll off, or can be quickly blotted away. Light to medium stains can be easily spot cleaned with just water and a clean cloth. Treat spills and stains immediately.

For tougher stains, follow the steps below:

1. Gently blot away any excess liquid or spills
2. Prepare a cleaning solution of 1/4 tsp mild, enzyme detergent (such as Tide®, Woolite® or Dawn® dishwashing liquid) per 1 cup of lukewarm water
3. Work the solution into the fabric using a sponge or soft bristle brush
4. Rinse the cleaner from the surface with a clean cloth and water (removing cleaner residue prevents future soil buildup)
5. Repeat the process if needed and then let the fabric air dry

CARE INSTRUCTIONS

Regular and proper maintenance of your upholstery fabric will reduce soil build-up and help the fabric last for generations.

- Vacuum regularly with an upholstery attachment to thoroughly dust and remove lint.
- Promptly treat spots and stains. See cleaning instructions.
- Deep clean periodically to remove accumulated dirt with a hot water extraction cleaner. *Make sure to specify no added solvents.

We are proud to offer an ever-growing selection of Lifeguard performance fabrics. Visit our website, CharlotteFabrics.com to see them all!!
